

Polypore's Commitment to Environmental, Safety and Health

By integrating environmental, safety, and health considerations into all aspects of our business, we strive for zero harm to our employees, our communities and the environment. Polypore's goal is to achieve sustainable growth and accelerated productivity while ensuring compliance with all applicable laws. We develop and produce technologies that expand the sustainable capacity of the world; and, our environmental, safety and health management systems reflect the Company's values and help us meet our business objectives.

We protect the safety and health of our employees, and minimize the environmental footprint of our operations through efforts to prevent illness, injury and pollution.

We are committed to compliance with applicable environmental, safety, and health laws everywhere we operate.

Commitment to environmental, safety, and health considerations is an integral aspect of our product design and manufacturing processes.

Our management systems apply a global standard that provides protection of both human health and the environment during normal and emergency situations.

We abide by the Company's own strict standards even in cases where local laws are less stringent.

Polypore's senior leadership and individual employees are accountable for their role in meeting our commitments.

We measure and periodically review our progress and strive for continuous improvement.

These are our commitments to environmental, safety and health concerns as we strive for zero harm everywhere we operate.
